EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

This communication is an Examiner's reasons for allowance in response to application filed on 09/22/2005, assigned serial 10/528,572 and titled "Method for the Detection of an Impact"

The following is the Examiner's statement of reasons for the indication of allowable subject matter:

The applicant's amendment and arguments filed on 06/14/2007 have been fully considered. After carefully reconsidering the application and the applied prior art, the examiner has realized the application is patentably distinct from the prior art. The prior art are not deemed strong to make the application unpatentable.

The cited references to Hirao and Yeh fail to disclose the step of "adjusting a sensitivity of the detection, by adjusting at least one of the first threshold and the at least one second threshold, in accordance with the first comparison in that the at least one second comparison is performed only after an amount of the first threshold is exceeded". None of the references, neither alone nor in combination, has been found discloses or suggests said claimed limitation.

Therefore, the claimed invention is not obvious to an ordinary skill in the art. Accordingly, the claimed invention is patentable.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan C To whose telephone number is (571) 272-6985. The examiner can normally be reached on from 8:00AM to 5:00PM.

Art Unit: 3663
